ENVIRONMENTALLY FRIENDLY

Manufactured with a high content of recycled material (circular economy and ocean-bound plastics), our displays are 100% sustainable and fully recyclable at the end of their lifecycle. All components of the display are recyclable in New Zealand.

Components

Recycled polypropylene (#5 plastic): shelves, poles, curved base, and lid.

#5 plastic can be recycled through kerbside programs, or via commercial recyclers nation-wide. The plastic is ground down for re-use and utilised in New Zealand's plastic moulding industries.

Polystyrene: printed header.

Recyclable through Expol and other polystyrene manufacturers, including their nationwide retailer collection point partnerships.

DURABLE, STRONG AND LIGHTWEIGHT

The use of injection molding and extrusion provides excellent quality and the ability to bear heavy loads. The materials also make the displays suitable for refrigerated environments.

Each of the 5 shelves can hold a weight of 17.32kg, with a total weight of 86.6kg for a full display. Each shelf can hold 26 x 355ml cans or 19 x 480ml cans.

Each display weighs approximately 5kg - much lighter than metal yet offering the same longevity.

FAST, MODULAR ASSEMBLY

Save time for in store merchandisers! One person can assemble the display in 3-5 minutes and without any special skills or tools.

One display per box, including instructions. Each box weighs just 5kg.

COST-EFFECTIVE

Our can displays are competitive, often more efficient than wire displays and comparable to corrugated options, offering exceptional value.

DISTRIBUTION - BIG SAVINGS ON LOGISTICS

Displays are delivered unassembled (knockdown/flatpack), in a box, significantly reducing freight, warehousing, and logistical costs.

Each unit packs down to a 400mm x 400mm x 400mm box.

Each unit weighs approximately 5kg.

SHIPPING

Each unit weighs approximately 5kg.

Each unit packs down to a 400mm x 400mm x 400mm box.

A 20-foot container fits 350 displays. A 40-foot container fits 900 displays.

Mimimum Order Quantity - 350 units

When an order is placed, manufacture (no matter the volume) and delivery takes 10 weeks. Total order volumes can be split between multiple countries.
